DISASTER COPILOT

Disaster Analysis & Emergency Response Report

OVERALL RISK LEVEL: HIGH

Location	Visakhapatnam, Andhra Pradesh, India
Coordinates	17.68009, 83.20161
Report Date	28 October 2026
Report Time	11:56 PM

Executive Summary

This report presents a real-time disaster risk analysis for Visakhapatnam, Andhra Pradesh, India. Based on current weather, seismic, and volcanic data, the overall disaster risk is assessed as HIGH. The emergency response system has been activated, identifying 2 hospitals, 4 shelters, and 4 food and relief resources nearby.

Generated by Disaster Copilot, a predictive multi-agent early-warning and emergency response system combining live environmental data with modeled emergency-resource estimates.

6. Recommendations

- Moderate flood risk detected: monitor rising water levels closely and prepare an evacuation plan.
- Nearest hospital identified: St. Mary's Medical Center — Central (3.9 km away) — keep this location on hand.
- Follow the recommended safe evacuation route, proceeding via: Start, then SafeZone1, then SafeZone2.
- Stay tuned to official government and disaster management channels for updates.
- Keep an emergency kit ready with essential supplies, water, and medication.

7. Conclusion

Preparedness Level: Level 3 - Critical

Overall, Visakhapatnam is currently assessed at HIGH disaster risk, corresponding to a preparedness level of Level 3 - Critical. Immediate action required. Activate full emergency response protocols and follow evacuation guidance without delay. Emergency response resources have been identified and are detailed in this report. Continued monitoring is advised as conditions may change. Stay safe and prepared.

Note: Where live OpenStreetMap coverage was insufficient for a resource category, this report supplements it with clearly-marked modeled estimates (see 'Src'/'Source' columns above) so response planning is not left with gaps.
